New coverage and services for 2026

Information and contact

New cover

Therapeutic provisions

Lymphatic drainage following cancer treatment

We offer lymphatic drainage following oncological lymphadenectomy, with a limit of 20 sessions per insured person per calendar year, subject to prescription.

Psychology for neurodevelopmental disorders

Psychotherapy sessions for the treatment of symptoms associated with Autism Spectrum Disorder (ASD) and Attention Deficit Hyperactivity Disorder (ADHD).

The maximum number of sessions will depend on the age of the insured person and the specific terms of the policy.

A medical report, prescription and authorisation are required. 6-month exclusion period.

Cutting-edge medical diagnostic technology

Extended cover for magnetic resonance cholangiography (MRC)

Magnetic resonance cholangiography (MRC) and magnetic resonance cholangiopancreatography (MRCP) for the exclusion of choledocholithiasis and cancerous disease of the biliary and pancreatic ducts.

A medical report, prescription and authorisation are required. 6-month exclusion period.

Hospitalisation and surgical procedures

Extended cover for multiparametric MRI-guided prostate biopsy (mpMRI)

Inclusion of cognitive prostate biopsy guided by multiparametric functional MRI (mpMRI) in the following cases:

- Early detection of occult prostate cancer (not detectable by current immunoassays).
- In cases of high clinical suspicion with persistently elevated PSA (more than three months).
- When a prostate lesion identified by multiparametric MRI (mpMRI) is reported as PI-RADS ≥ 3.

A medical report, prescription and authorisation are required. 6-month exclusion period.

Transperineal prostate biopsy guided by image fusion

For the early diagnosis of occult prostate cancer when elevated prostate-specific antigen (PSA) persists for more than three months, or when a prostate lesion identified by multiparametric MRI (mpMRI) is reported as PI-RADS ≥ 3 (indeterminate or high suspicion of prostate cancer).

A medical report, prescription and authorisation are required. 6-month exclusion period.

CT angiography (AngioCT)

Multislice CT angiography (AngioCT) and MR angiography (MRA) in the following cases:

- Diagnosis of arterial and venous vascular disease.
- Monitoring and control of vascular prosthesis integrity.
- Assessment of arterial dilatations or aneurysms, vascular malformations and coarctations, regardless of location.

A medical report, prescription and authorisation are required. 6-month exclusion period.

Other cover aspects

Information and guidance on dependency and disability

We provide insured persons with information on the regulations of each Autonomous Community relating to dependency and disability, associated procedures, available support, amendments, and assessment of changes, among others.

Increase the reimbursement limit for psychology

With the Classic and Elite options of the DKV Mundisalud policies, the reimbursement limit per session is raised from €40 to €75.

Processing of disability and dependency certificates

If the insured person is eligible to apply for a disability and dependency certificate, as well as to request changes, variations, or updates to their grade, the process will be managed and will include:

- Collection of documentation and authorisation from the applicant.
- Submission of the application anywhere in Spain.
- Monitoring and response to requirements related to the application.
- Ongoing communication on the status of the application.
- Administrative paperwork and claims.

Legal claims or actions are excluded.

- Phone or WhatsApp: 682 571 073
- E-mail: discapacidadydependencia@dkvintegraltia.org

Digital health

New features in the Quiero cuidarme Más app

Instant teledermatology

We have expanded our teledermatology service with a new mobile-based diagnostic option, with no appointment required. Insured persons simply send their images and answer a short questionnaire. A dermatology team will assess the case and send back the diagnosis and treatment within 48 hours.

For modular policies, this service is included in the Specialists module.

Heart care

New cardiovascular prevention plan with pioneering medical technology that measures blood pressure without contact or additional devices. It works through the mobile phone camera. Includes medical follow-up and priority care if a cardiovascular risk is detected.

Aimed at people aged 40 to 70.

New Healthy Longevity Plan

A three-month digital programme for people who want to stay active, independent, and enjoy a good quality of life as they grow older. Includes a medical digital solution with a personalised plan for cognitive training, physical activity, nutrition guidance, and emotional and social wellbeing recommendations.

Aimed at people aged 55 to 75.

Emotional well-being

The importance of being close

In the Cuida tu Mente section of the Quiero Cuidarme Más app, people can assess their emotional well-being and receive personalised care from a psychologist via chat. Easy, convenient.

New services with discounts from the DKV Club Salud y Bienestar

Physiotherapy at home

We offer professional physiotherapy services without leaving home.

Aesthetic medicine with Hedonai

We offer the most advanced aesthetic medicine treatments at Hedonai centres in El Corte Inglés, with exclusive benefits for all insured persons.

Glisir

With Glisir, we provide specialised neuropsychological assessments for children, adolescents, and adults with ADHD and dyslexia. Includes memory re-education and telerehabilitation to support development at every stage of life.

Health and nutrition

Extension of nutrition services via the Nootric app, with nutrition advice for life stages such as menopause or pregnancy, and personalised plans.

Luracare

DKV, together with Luracare, offers dental, visual, and hearing health services. Free dental consultations and check-ups, dental cleanings, prosthetics, dental treatments, and optical services with discounts.
